LIFT
THE EMPLOYMENT OF YOUTH

About Educo:

Education and Development Foundation-Educo is a global development and humanitarian organisation based in Barcelona, Spain and with over 30-years' experience working in 18 countries in Asia, Africa, Latin America and Europe. Since 1999, Educo Bangladesh works with children and their environment to promote just and equitable societies that guarantee their rights and well-being. Currently, we are implementing Bangladesh programmes in 11 districts in partnership with 16 local NGOs under three broader strategic priorities of Education, Protection and Governance.

Project Background:

In the project implementing areas, a significant portion of educated young individuals find themselves grappling with unemployment. This predicament has led both the youth and their guardians to lose interest in general education. Unfortunately, these situations often push them to be a considerable burden for their families and society at large. Many unemployed youths experience frustration, leading some to resort to criminal activities, including drug abuse. Compounding the issue, many children and youths are working in hazardous condition across various workplaces, frequently falling victim to severe abuse and exploitation. Although number of youths and their families believe that Technical and Vocational Education and Training (TVET) can change the lives of youths, but they do not have opportunity to pursue the training due to various reasons like traditional mind-set, lack of information, unable to pay training cost, unavailable quality training centre etc.

Considering the situation and to meet the objective, project has plan to conduct the training need assessment to identify the feasible training trades of selected youths. Besides, job market analysis will also conduct to identify the viable vocational and technical training trades. Moreover, the TVET institutions, job providers, family members of the selected youth and relevant government departments will be the key stakeholders of this project.

Project Title:

Leveraging youth employment in Bangladesh through improving their employability and competitiveness to fit with the 21st century job market (LIFT)

Project Location:

The project location will be 10 thanas of Dhaka City Corporation namely:
