

Climate Change programme of Educo Bangladesh

Brief about Educo and Climate Change Programme:

Education and Development Foundation- Educo is a global development and humanitarian organisation based in Barcelona, Spain, and with over 30-year experience working in 14 countries in Asia, Africa, Latin America, and Europe. Since 1999, Educo Bangladesh has been working with children and their environment to promote just and equitable societies that guarantee their rights and well-being. Currently, we have been implementing development programmes in 10 districts across the country, with the support of 15 local NGOs as implementing partners, for ensuring localisation and sustainability under three broader strategic priorities of Education, Protection, and Governance. We have a strong existence in the Rohingya camps since 2019.

Educo Bangladesh has been implementing youth-led and community-managed climate change and environmental project in the Shariatpur and Borguna districts funded by the Swedish Postcode Foundation and two implementing local partners. Another project funded by the EU has been implementing in Satkhira for the people in threat of

climate displacement and the people already displaced for climate-induced disasters to improve their livelihood, basic services, and resilience. Moreover, climate change is a cross-cutting issue in all of our programmes throughout Bangladesh. The overarching goal of the programme is “to enhance the resilience, adaptive capacity, and oversight of communities to manage climate variability and environmental risks, through the active and informed engagement of young people and their community.”

Where we focus:

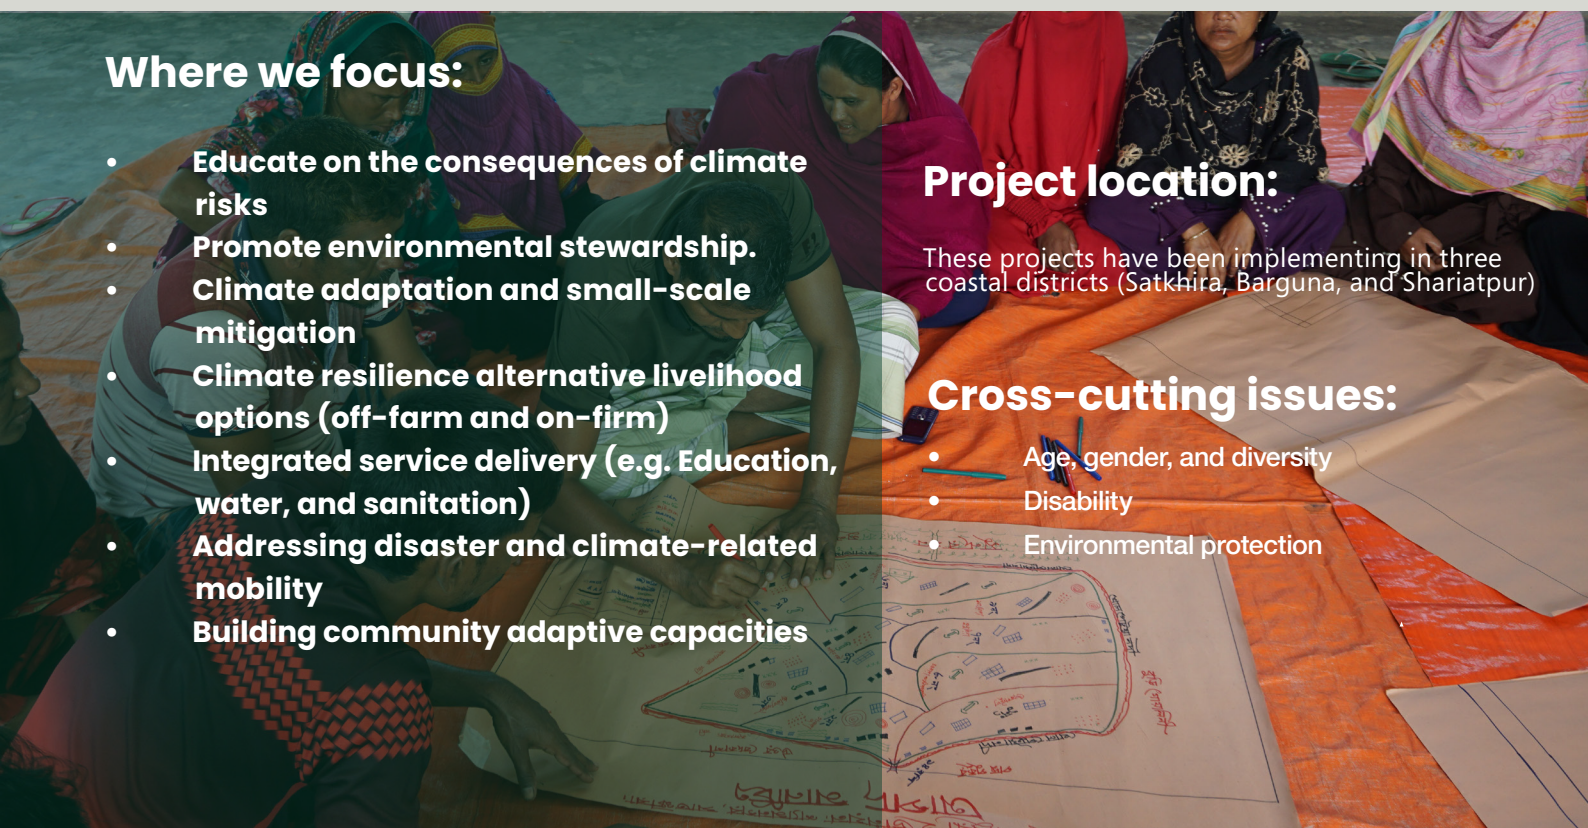

- Educate on the consequences of climate risks
- Promote environmental stewardship.
- Climate adaptation and small-scale mitigation
- Climate resilience alternative livelihood options (off-farm and on-farm)
- Integrated service delivery (e.g. Education, water, and sanitation)
- Addressing disaster and climate-related mobility
- Building community adaptive capacities

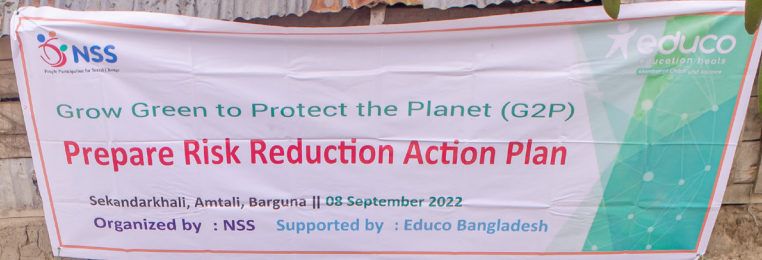

Project location:

These projects have been implementing in three coastal districts (Satkhira, Barguna, and Shariatpur)

Cross-cutting issues:

- Age, gender, and diversity
- Disability
- Environmental protection

Strategies:

- Youth-led actions and promote youth leadership as an ambassador of the community
- Community-managed approach (The community will prepare their risk reduction action plan following risk assessment related to disaster and environment. Implement the action plan as well as periodical review of the plan)
- Children and youth centered
- Evidence-based locally adaptive and mitigation solution
- Local advocacy and local resource mobilisation

Our reach:

- Programme coverage: 3 sub-districts in 3 districts (Satkhira, Barguna, Shariatpur)
- Adolescent and Youth Club (AYC): 49
- Number of schools: 40
- Number of communities: 52
- Number of beneficiaries: Total: 22,830 (Children: 350, Adolescent & youth: 22480)

Whom we work with:

- Children, adolescents, and youth of climate-vulnerable communities
- Internal climate migrant / internally displaced people/vulnerable occupational groups
- Teachers/school management committee
- Local authorities/ line departments
- Local representatives
- Local committees (like disaster management committees at different levels, CPP, and climate migrant rights groups/federations)
- Economic service providers

Our partners:

Uttaran, Satkhira
NSS, Barguna
Shariatpur Development Society (SDS), Shariatpur
Patuakhali University (technical partner)
Khulna University (technical partner)

Our development partners:

European Union (EU) through UNOPS
Swedish Postcode Foundation through Barnfonden
Sponsorship fund of Educo
